The
Bridgewater
ALUMNUS

NOVEMBER 1970

President's Message

The Alumni Association strives to stay in tune with Bridgewater College, supporting her in many ways. We have organized for this current year to accomplish big things for our Alma Mater. The acceptance, by many people, of jobs requiring responsibility and time gives the Executive Committee a greater assurance that we will accomplish more.

Homecoming 1970 proved to those persons enjoying the campus again that "There is a place for us," this year's theme. The day was filled with opportunity and fun as many of us returned to renew friendships and acquaintances. The award of a "most valuable player" trophy helped to strengthen the alumni-student relationship.

We are seeking a stronger Bridgewater by requesting that Alumni share the names of persons who may become students when given an invitation. You have already received our mailing.

It would be a big help to learn of your wishes for our association. Are we overlooking opportunities? Let us hear about those concerns of yours.

W. Wallace Hatcher '55

The Bridgewater Alumnus is the magazine issue of the Bridgewater publication series, published nine times a year, each month except February, June and August by Bridgewater College, Bridgewater, Virginia 22812. Bridgewater College is a member of the American Alumni Council and the American College Public Relations Association. Second class postage paid at Bridgewater, Va. Patricia M. Churchman, Editor. Volume XLVI, Number 4, November, 1970.

The New Art Major

"WHEN there is sufficient demand to justify it, private instruction is offered in the various branches of art"—the catalog stated in 1936, and was still so stating twenty years later. In 1958 three art courses were offered to the students, drawing and painting, art appreciation, and arts and crafts—that course being designed to meet the needs of elementary school teachers and homemakers. In 1958 a total of 49 students took art courses—the general education requirement stating that they must take six hours in a foreign language, music, and/or art, with an additional six hours in art and music.

Professor Paul M. Kline came to the College in 1959, succeeding Mrs. Olivia Delp Graham. In 1960-61, with four courses being offered, 100 students were enrolled in the department. When Robert Purvis joined Paul Kline in 1968, doubling the art department faculty, there were 253 students, several of them desiring an art major, with nine courses being offered.

In some cases, students, with their interest in art awakened at Bridgewater, had to transfer in order to major in it. Some stayed, majored in another department, and took what art courses they could fit into their schedules.

In 1969 the department moved out of its East Hall home to improved facilities in the basement of Rebecca Hall—classroom, office, three studios, and outside court, with gallery space in the campus center for exhibiting work by faculty, students, invited artists, and traveling exhibitions.

Taking advantage of the momentum gained by the move to new quarters, the art department faculty, with student interest and backing, proposed a major in art in the fall of 1969, and the faculty and board of trustees approved it in the spring.

A prerequisite course to all studio work is Art Structure. In the first semester the students work out problems in composition and properties of color, the use of value, texture, line and the integration of these elements. They explore geometric and organic form in three dimensional compositions in the second semester.

Suggested courses for fulfilling general education requirements are Visual Arts and/or Art History. In Visual Arts the professor and students compare objects from various periods of time to search for some common element.

"I attempt to place certain objects into their historical context, but do not necessarily attempt a chronological sequence," says Professor Purvis. "I attempt to point out qualities in 20th century work that are in a sense timeless and at the same time, I

use objects from the late 19th and 20th centuries as base point criteria." When asked to give an example, Professor Purvis mentioned the sculptor, Henry Moore. "Many of his sculptures are combinations of form and space similar to those found in Pre-Columbian sculpture and Gothic sculpture."

"Let me add that I stress the importance of viewing the object for what it is in itself—rather than what it might be the visual equivalent for. In the case of a painting by Jackson Pollock, for instance, there is no attempt to represent anything from nature, and no attempt to produce a visual equivalent. The painting is its own entity—with no explanation attempted beyond this. It must be taken in view of its peculiar structure, fabric, and richness."

"Or an Impressionist painting by Monet, for example, when scrutinized, is not so much a replica of a scene in nature, as it is a vibrant composition of color and light. It thus becomes also another kind of reality apart from nature as we see it."

Studio courses in drawing, painting, and sculpture are offered. The beginning sculpture course introduces the student to a variety of materials including plaster, clay, wood, and cast stone.

When asked why he came here to take art, a summer school student said, "I came to Bridgewater because I wanted a beginning course where I could learn the basic fundamentals." He was shaping a chunk of wood into a nonrepresentational piece that sort of evolved as he worked with it.

A girl, molding a torso in clay, added, "I really like the art department here because there aren't many students, and the professor takes time to help me with my work."

An art major will lend itself well to the 3-3-1-3 curriculum interterm projects. Juniors and seniors who have a solid background in studio courses might use the three-week interterm for concentrated effort on a drawing, painting, or piece of sculpture.

"A research piece on a phase of art that particularly interests the student could be done," Professor Kline stated. "Or there could be a concentration on some movement, such as Impressionism, Cubism, or Fauvism. Reading and class discussions would be done in preparation for off-campus trips to galleries and art collections. There are a great many possibilities and I'm very excited about it," he concluded.

"When I changed my major to art, I was really happy," a girl in the Advanced Sculpture class said. "It has always been art in my life—I wouldn't have been able to stay at Bridgewater if I couldn't have majored in art."

Yes, World, There Is

During the 1970 Summer Session at the University of New Hampshire, I was involved in teaching a course in *Man and His Environment*. A large percentage of this course was devoted to population dynamics and the influence or lack of influence of these biological principles to human population problems. Data collected during the development of this course, along with the factual material presented at the 1970 Spiritual Life Institute at Bridgewater College, comprise the basis for the following comments.

It is somewhat astounding that in this historical era which we have called the Scientific Age, mankind itself refuses to place credence in the warnings of those for whom the age was named, the Scientists. It is, of course, true that scientists have never and will never reach unanimous agreement on all issues, but in terms of majority opinions, the warnings of the scientists as to the dangers of radiation, of cigarettes, of insecticides have all been ignored by the general population until these problems became not problems, but threats. Historically speaking, when humans react against threats, they do not react in the same manner as they will against problems. Generally, threat reactions against the threats of over population being projected today, have in many instances been neither well thought out or thoroughly investigated. The results of this may well become more fearful than the problem itself.

Over population is not a theoretical matter. It is a fact that exists now, and it is also a fact that it is geometrically progressive. It has been estimated that from the year 600,000 B.C. to the year 1962, 77 billions of people have been born on this earth; but it is also clear that 23 billion of this 77 billion have only come into being during the last 300 years of our existence. The most conservative estimate of the net increase in population of our world today is now given as 170,000 for every twenty-four-hour interval. If this figure is correct, at the end of this year we will have increased the population of this world by 59 mil-

lion. As noted, these figures are thought to be conservative; the more liberal figures states that over 70 million will have been added to our world this year, and the result of this can only be misery for much of this planet, a misery that can only increase until it becomes a catastrophe. Regardless of how one may wish to classify the solutions to this problem, there are only two alternative answers—either we, the peoples of this world, increase the death rate, or we decrease the birth rate. There are no other solutions that are scientifically acceptable. There are, however, a number of options within these two alternatives, and a brief examination of these is certainly in order if the magnitude of the problem is to be fully appreciated.

First of all, it is abundantly clear that the easiest control mechanism that is at hand, is all-out nuclear war. This not only has the advantage of significantly increasing the death rate, but it will do so world wide, it will do so rapidly, and it will involve vast numbers of people. These comments are not at all to be taken as being facetious—they are based on certain facts which are evident in the world today. According to some ecological experts, there are three nations in the world that have now reached the point of no return in terms of over population. These nations are Haiti, Egypt, and India. To emphasize what is meant by "no return," one has but to look at statistics taken from the book, *Population, Resources and Environment* authored by Dr. Paul Erlich, and published in 1970. In 1965, the government of India began a program to reduce the birth rate per thousands of individuals from 40 to 25 over a period of ten years. By the year 1969, the population index per thousand in India had not dropped, but had risen to 43.

Over-populated nations mean hungry people, and when people get hungry, the first thing they do is to turn against their neighbors. Two of the three nations mentioned in the previous paragraph as having reached the point of no return in terms of populations, have the ability at this time to carry on nuclear warfare.

a Population Problem

The idea of a nuclear war is to any sane, intelligent person simply impossible. The cost materially and physically places it almost, but not quite, in the realm of what might be termed "fantasy." But if for the sake of argument one says that no sane, intelligent person of ethical background would recommend such a course, does one go on to say that no sane, intelligent person of ethical background would recommend that food shipments to the undernourished and underprivileged be halted? If one agrees with this last statement, one finds that he or she is very greatly mistaken. Today there are 1 billion undernourished or malnourished beings on this earth. Conservative figures state that every year 4 million of these unfortunates die of direct starvation. By "direct" is meant that these individuals do not die of disease or chronic illness as a result of malnutrition, but that they die of anorexia—they starve to death. These people need food and food is being sent to them by many, many nations, but the continued feeding of these people will only mean that now 3 million of these 4 million will die of direct effects, with the other million dying more slowly of indirect causes, but being able to procreate before their deaths. In the February, 1969 issue of

Bio-Science, which in America is very close to being the official voice of all biological scientists, the editor, David M. Prescott, wrote, "because it creates a vicious cycle that compels human suffering at a high rate, the provision of food to the mal-nourished nations of the world that cannot or will not take very substantial measures to control their own reproductive rate is inhuman, is immoral, and is irresponsible." Mr. Prescott is quite sane; he is very intelligent, and he is certainly not unmindful of ethics. Obviously, the question is a harsh one. Should we continue to feed the borderline number in terms of their life expectancies in underdeveloped nations with expanding populations? It can only be added that Mr. Prescott's mail hasn't opposed his comments; to the contrary, he has been upheld by letters from all over the world. The facts are very clear. Feeding a borderline population serves no good insofar as the population problem of that nation is concerned.

The two reactions thus far mentioned, have been positive ones in that they would act either to directly decrease the present population, or to at least hold it at a stable figure. Neither of these actions is particularly appealing.

Dr. William L. Mengebier, professor of biology at Bridgewater, holds a B.S. degree from The Citadel, M.A. from Oberlin, and Ph.D. in physiology from the University of Tennessee. A member of the faculty since 1968, he received an award from the Association of Southeastern Biologists for "especially meritorious teaching" last year. He has had articles published in the American Journal of Physiology, the Virginia Journal of Science, Comparative Biochemistry and Physiology, and others. Dr. Mengebier is also an ordained Episcopal clergyman, who believes that science and religion, rather than being mutually exclusive, have the same goals.

Let us now look at the other solution—the reduction of the birth rate. Based on scientific evidence, it is clear that the population of this world can be maintained at its present level with the means now available to us. What may not be clear, however, is that if the individuals composing the various nations of this world do not use these methods now available to them, they may very well be used for them or on them, and this definitely includes the United States. These words obviously refer to a concern about involuntary control, and in order to emphasize this concern, the following quote from the November 7, 1969, issue of *Science* would seem to be in order. “The government of the United States should commit itself immediately to the goal of a zero rate of population growth and to the task of obtaining, by one means or another, popular acceptance of the two-child family.” *Science* is the official journal of the American Association of the Advancement of Science, and is probably the most influential journal of the scientist in the United States. Not only can this journal predict closely the future scientific course of this nation, but it quite often alters it and may in some cases actually dictate it. Certainly the above-mentioned quote is relevant; it speaks to today, not tomorrow, and it speaks of “means.” Thus, what means do we have? Basically, there are two—either we may utilize chemical or physical means that will prohibit ovulation, conception, or implantation, or we may turn to large-scale abortion.

There seems to be little controversy in stating that abortion as the selected means of birth control is not generally as acceptable to society as are other methods. This statement should not be misunderstood. It does not refer to the liberalization of the abortion laws of either this state or this nation in terms of therapeutics. Many of the laws still on the books as regards the rights of women are absolutely preposterous, but the idea of abortion, to individuals raised in Western society, as the voluntary or involuntary method of universal birth control per se does not appeal psychologically, spiritually, physiologically, or sociologically. It must, however, be admitted that abortion as a national means of birth control can be made to work. There is one industrial nation today with a balanced population, and that country is Japan. At the end of World War II, its industries burned out, its food supply at perilously low levels, Japan was suddenly inundated by refugees from China and Korea who had been absent from the homeland for generations. Japan had no choice; she balanced her population and she did it primarily by abortion.

It is also quite clear that recent judicial decisions and legislative actions have widely increased the legal availability of abortion in our own nation. Yet, as the primary method of birth control, certainly as an involuntary method, abortion can never enhance our appreciation of life—but then neither does starvation.

What other choices do we have? It seems that the most logical ones include some form of the “pill,” of intra-uterine devices, or of temporary sterilization of the male by a vasectomy. These methods, certainly

the first and the last, do not in any way deny life as we know it, for in both methods life is not begun. The time has now come for all groups of peoples concerned with the meaning of our existence, an existence we are told was meant to be good and not miserable, to formulate a mature policy for the generations now in being and for those to come, of family planning by immediate, voluntary birth control. This will involve much more than just what method of birth control is to be used and how to use it to prevent ovulation or conception. This must involve a renewal of our meaning of marriage—something we seem to have tended to forget—to renew our meaning of the family, or a society, of a nation, of a world. It will involve the sacrifice for some of surrendering the large family that was truly wanted. It will involve dialogue on the physical and spiritual meaning of our lives. It will mean giving tremendous financial support to further the means and meaning of birth control for those nations whose institutions, both of learning and industry, have not reached the level of ours. It is a task for a mature, reasoning people, and it is a task to be done now; for if we put it off, if we refuse to accept the facts, it will be done for us.

Again, there may be some question as to the concern shown in this article as to the possibilities of involuntary controls. That this concern is real may perhaps be best understood by referring again to *Science*, this time to the January 23, 1970 volume in which the following comments by Dr. C. Gardner Shore of Washington State University are found. “Population increase can be reduced to zero only by laws which make sterilization compulsory. Such laws will be passed only when a significant majority in a given nation are ready to accept them. Biologists may propose such actions now without committing professional suicide—politicians cannot.”

To some, Dr. Shore’s statements may have little validity, but it must be pointed out that if one had projected twenty years ago that congressional action would lead to the banning of cigarette advertising over T.V. networks, and that a total legal ban on smoking is not impossible, such a projection would have been met with loud and long laughter. It is true that politicians must remain in contact and harmony with their constituents, but biologists do not, and have not, and these truths are quite evident, not only insofar as cigarettes are concerned, but also in the case of insecticides. Thus, as Dr. Shore continues, the solution to the population explosion may be (a) “that voluntary sterilization be encouraged, and all costs involved therein be paid by the government” and that (b) “sterilization of any female that has produced three offspring be made mandatory by the law of the land.”

The facts are in; the scientific community has begun to speak. We are presumably an educated people with some reasoning ability, and it seems clear that either we will control our population on a voluntary basis, or it will be done by decree. And if we don’t accept this, then we are left with the alternative of the bomb.

A Special Challenge Goal for '70-'71

The 90th Anniversary Fund Campaign

President Geisert has announced a special challenge goal of \$1,400,000 for the final year of the 90th Anniversary Fund campaign. He stated that the challenge goal was set in response to an urgent need for a track and athletic field improvement project, and for a new pipe organ for Cole Hall. This is an increase of \$150,000 over the original goal. It is hoped, he added, that the development of a challenge goal, combined with the special interests of college alumni and friends, will bring to realization these urgent needs.

The track and athletic field improvement project will involve an outlay of from \$80,000 to \$85,000, of which over slightly more than \$25,000 is at hand. The cost of the pipe organ project is expected to approach \$100,000.

The announcement was made October 16 at the president's dinner, in the Kline Campus Center, held in honor of those persons who have given major financial support to the college during the previous year. In attendance were members of the newly-established Benefactors Club, those persons who have given \$1,000 or more in support of the college during the past year; and members of the Investors Club, who have given \$500 to \$999 to the college during the year. Club memberships totalled 515 during the 1969-70 college year. Members of those clubs are currently enjoying special privileges including admission to athletic events and will attend special occasions during the year. All those contributing \$100 or more are eligible for club membership.

Alumni Annual Giving Chairman

R. C. "Sam" Reid '60, has been appointed by Alumni President W. Wallace Hatcher '55, to serve as this year's chairman for Alumni Annual Giving.

A business administration major at Bridgewater, Sam is presently serving as secretary-treasurer of Murray Orchard, Inc., located at Cloverdale, near Roanoke, Va.

Always maintaining a high interest in the affairs of the College, Sam recently completed a term as president of the Roanoke Chapter of the Alumni Association. Last May he was elected to a three-year term on the Alumni Association Board of Directors. He is married to the former Marjorie Anne Murray '60. They have two children, Mary, 6, and David, 2.

Friends Campaign Head

The Friends campaign will be headed by Mr. George Tullidge of Staunton, Va. Mr. Tullidge holds membership on the President's Council at Bridgewater and has served as a member and chairman of the Parents' Advisory Committee. A son, Archer K. Tullidge, '53, and a daughter, Anne Tullidge Bell, '68, graduated from Bridgewater.

Find Your Living Memorial In the Life of Some Young Person

The good that men do lives after them, but their memorials come in different forms; for some in cold stone, for others in making sure that young people have the chance to prepare for lives of useful service.

Your bequest, channeled toward Bridgewater College can assure future educational opportunities for these youth, in the context of the private, church-related college.

Your attorney or business advisor can show you how to build a living memorial through a legacy to Bridgewater College. For further information write David L. Holl, Director of Development, Bridgewater College, Bridgewater, Virginia 22812.

Riverside Field after fall rains. Renovation will provide adequate drainage for the new all-weather track.

With the Freshmen

*Top—Joy Fawley, Bob Bowen,
Donna Fawley. Bottom—Dennis Baker,
Cindy Gerhard, Greg Peters,
Bonnie Carlton.*

THE class of 1974 numbers 262—an increase of 16 over last year's 246. They come from 13 states, the District of Columbia, Hong Kong, France, and Puerto Rico. Forty-six per cent of the freshmen are from Virginia. That number is down from 51 per cent last year. Leading states represented, after Virginia, are Maryland, 65 students; Pennsylvania, 25; New Jersey, 21; and New York, 8.

There are 21 different denominational preferences among the members of the class, with Methodists leading the list at 61. The Church of the Brethren was listed by 58 students.

We interviewed some of these freshmen students, selected at random, to see why they had chosen Bridgewater.

Bob Bowen is from Frostburg, Maryland. His father is a lawyer and his mother teaches school. He has a sister, Vickie, who is a junior at Bridgewater. Bob was on the teen forum of the Methodist church to which he belongs, was on the teen council for the

town, was a representative at the Rotary Club Citizens for Tomorrow Conference. Bob lettered in football, basketball, tennis, and golf, was a Boys State representative in his junior year, and received an award for athletics and leadership. When asked why he chose Bridgewater, he said that when he had visited here, he had noticed how friendly everyone was. He didn't want to be a "townie" at Frostburg State College and he didn't want to go to a large university where he felt he might be just another number.

Bonnie Carlton of Richmond, Virginia, is starting out as a music major. She was a member of the Hi-Lo's, a singing group, secretary and president of the music club, in the drama club, and a member of the a cappella choir. She said that she chose Bridgewater because "the people were so friendly and that impresed me because I like to get to know people. They spoke to me like they'd known me before, even when they hadn't."

Dennis Baker, a political science major from Lavale,

Maryland, was in the drama club, Hi-Y, on the year-book staff, a member of National Thespians, ran cross country and won a speech award at Allegany High School in Cumberland, Maryland. A member of the Church of the Brethren, he heard about Bridgewater from someone in his church. He applied to one other college, but decided to come to Bridgewater because of the friendly atmosphere. He was also pleased that, after he had applied, he received news of campus happenings throughout the year.

Joy Fawley of Clinton, Maryland, chose this college because "Bridgewater is a family tradition." Her father, Gerald Fawley, her grandfather, Adam Miller, and brothers, Jerry and Rick, who is a senior this year, attended Bridgewater. A member of several clubs in high school, Joy won an art award last year and is very pleased that Bridgewater now offers an art major.

Greg Peters was on his high school debate team, in the choir, and worked in the American Field Service

program to bring a student from Turkey. A political science major with a law career in mind, he wanted a small, liberal arts college. He had been on campus during the Regional Youth Roundtable and liked the atmosphere.

Donna Fawley, daughter of the Rev. and Mrs. R. Dean Fawley of Bridgewater, thought that she would like a smaller campus. A member of the chorus, student council, National Honor Society, and Future Teachers of America in high school, she spent this past summer working as one member of the two-girl painting crew for the College.

Cindy Gerhard of Emmaus, Pennsylvania, was in the pep club, on the newspaper staff, basketball team, senior class play, and numerous other activities in Emmaus High School. A friend gave her a Bridgewater catalog and it appeared to be what she wanted. Through correspondence with admissions counselors, she felt as though Bridgewater was "interested in me as a person."

Homecoming Queen Joanne DeRossi.

HOMECOMING

HOMECOMING, Saturday, October 17, was a brisk, breezy autumn day, but Eagle fans grew somber as their team fell to Frostburg State, 16-7.

With the pep band playing snappily, Queen Joanne DeRossi was crowned at half time. A senior sociology major, secretary of her class, and a cheerleader, she is a graduate of J.E.B. Stuart High School in Falls Church. She was escorted by Jerry Spessard, captain of the football team.

Members of her court included senior class representative Daryl Montgomery, a home economics major from Media, Pennsylvania, and daughter of Mr. and Mrs. Richard A. Montgomery. She was escorted by John Ponton, senior class president. Mrs. Anne Scharon Economou, daughter of Dr. and Mrs. H. L. Scharon of Webster Groves, Missouri, and wife of Ken Economou, a senior physical education major from Brooklyn, New York, represented the junior class. She was escorted by junior class president, George Tulli. Gay Bunting, sophomore class representative, is a sociology major and the daughter of Mr. and Mrs. J. Allen Bunting of Towson, Maryland. She was escorted by sophomore class president, Grover Collins. Joan McIntyre, daughter of Mr. and Mrs. F. I. McIntyre of Hyattsville, Maryland, represented the freshman class. She was escorted by Gerry Deuterman, newly elected president of the freshman class.

At the end of the game the Alumni Association this year presented a "Most Valuable Player" award to Marshall Flora. It was presented by the association president, W. Wallace Hatcher of Broadway.

The selection of the recipient of this award was under the direction of Alumni Events Committee Chairman, Nathan Miller. Those alumni who helped make this selection were Don Glick, '49, director of athletics at Montevideo High School; Jerry Fawley, '66, assistant football coach at Broadway High School; and Alan Tibbs, '70, quarterback of last year's Eagles.

A coffee hour for returning alumni was held in the morning, and 190 signed the guest register. Following that and lunch in the Campus Center, was the Homecoming Parade, with themes from "Westside Story." Evening activities included a chorale concert and Homecoming dance.

楊

Buu Duong

DR. BUU-DUONG has been teaching at Bridgewater College since 1965. A native of Viet Nam, Dr. Duong received his early schooling in Hue. Coming to this country in the 1950's, he holds a B.S. degree from Ohio University and M.A. and Ph.D. degrees from Harvard University, where he was a Harvard Resident Fellow.

Dr. Duong has traveled in this country and Canada, and extensively throughout the continent of Europe. We asked Dr. Duong to tell us something about Hue, where he was born. He replied that Hue was the imperial capital of Viet Nam during the Nguyen Dynasty. It is younger than Hanoi, which was the capital during the earlier dynasties, and older than Saigon. Culturally, Hue was and remains the cradle of central Viet Nam. Its tradition in literature and music carry a strong individual stamp and are rather different from those of either the North or the South. These cultural characteristics of Hue have been little affected by the changes in the political demarcations.

When asked why he came to the United States in the 1950's when so many of his fellow Vietnamese, who went abroad to study, chose to go to France, he replied that he felt it was perhaps time to get a wider orientation. This, he said, was not just geographical but academic as well, for the French pattern of State examination and degree granting is not much different

in principle from the old Confucian system of State examination in East Asia.

We asked Dr. Duong if he would comment briefly about the arbitrary division of Viet Nam into North and South. He replied that the 1954 division of Viet Nam along the 17th parallel was an arbitrary expedient and was supposed to be temporary. He said that there had been a similar division, under different circumstances, around the 18th century that ended in reunification. "There is a strong sense of identity among the Vietnamese through their language and customs; and the regional characteristics, rather than diluting this, actually add more color and strength to it."

When asked about the hopes of his people, he commented, "The aspirations of the Vietnamese people throughout the period of French rule have been for national independence. It is unfortunate that the context of the cold war has cast upon the Vietnamese situation new international implications. The question remains whether one should persist in looking at the Vietnamese conflict from the standpoint of the cold war—which may not at all be the standpoint of the Vietnamese peasant—and whether any solution, no matter how well intended, which is based solely on an outside frame of reference, could find acceptance and success with the Vietnamese people."

New Faculty Members

The new head of the Department of Economics at Bridgewater College in Bridgewater, Virginia, is Dr. Lawrence W. Haynes, who came to Bridgewater from Washington, D. C., after thirty years of government service, primarily with the Statistical Reporting Service, U.S. Department of Agriculture.

Dr. and Mrs. Haynes and their three children lived in Bethesda, Maryland, and the children attended the Montgomery County schools. After receiving his Ph.D. degree from the University of Wisconsin in 1957, Dr. Haynes considered teaching, applied for a university teaching position, and was accepted, but decided against leaving the Department of Agriculture because the position would have been primarily a research position and he wanted the opportunity to teach. As the Department has a ruling of retirement after thirty years of service, he felt this would be the ideal time to go into teaching on a full-time basis. He has been teaching economics part time at the University of Maryland for the last three years. Interested in a small liberal arts college, Dr. Haynes applied through the Cooperative College Registry, and that is how the connection with Bridgewater was made.

"The pace is a little different than it is in Washington," Dr. Haynes remarked of Bridgewater. He added that the pace in Washington is rough and getting rougher. The real problem for him was that of commuting. Dr. Haynes commented that to him public apathy is the main cause of the transportation problem in the city. When he asked the members of his car pool if they would rather ride a bus pool to cut down on the number of cars going into the city, they all replied that they would rather drive. "It's cheaper to drive once a week, not considering the wear and tear on the car, or the wear and tear on the person."

Dr. Lawrence W. Haynes

"This wear and tear on a person is really something. It takes roughly two hours out of your day," Dr. Haynes commented. Dr. Haynes is delighted to be able to work at home, eat lunch at home, and walk to his classes on the campus after thirty years of battling Washington traffic.

Other new faculty members include Dr. John W. Layman of Virginia Polytechnic Institute, who is serving as Interim Professor of Mathematics and acting head of the Department of Mathematics through the 1970-71 academic year. Dr. Layman received his B.S. with honors from V.P.I., majoring in mathematics, and two graduate degrees from the University of Virginia. He held a du Pont fellowship at the University of Virginia from 1955-58. Dr. Layman and his wife, the former Jane Brugh, have four children: John Eric, 8, Charles, 6, and twin daughters, Rachel and Beth, 5 years old.

W. Steve Watson, Jr., of Atlanta, Georgia, has joined the faculty as Assistant Professor of Philosophy and Religion. Mr. Watson is a candidate for a Ph.D. de-

gree in philosophy and religion from Emory University in Atlanta. An honor graduate from Furman University, he has a B.D. degree from Southeastern Baptist Theological Seminary. He is an army reserve chaplain and has served in various church-related positions as youth director and associate pastor. A tennis player, he has won tournaments on the local, state, and conference levels. In college he was Southern Conference individual tennis champion. Mr. Watson and his wife, the former Ruth Elizabeth Colvard, are natives of Charlotte, North Carolina, and the parents of a young son, William Todd, born Oct. 6.

Robert C. Monroe of Tallahassee, Florida, has joined the music faculty as Assistant Professor in band and instrumental instruction.

Dr. Monroe received his doctorate in Music Education at Florida State University in August. He received his B.S. in Music Education from Lebanon Valley College, Annville, Pennsylvania, and his Masters in Applied Music (trombone) from the University of Miami. He did additional study at the Eastman School of Music in 1964 and 1966. He taught from 1958-1967 in the Florida school system and was an instructor in trombone at Florida State University in 1968. Dr. Monroe and his wife, the former Patricia Burgett, have three daughters, Tami Sue, Lori Ann, and Sheri Lynn.

Appointed as Instructor in Physical Education is Mary Frances Heishman. A 1966 graduate of the College, she received her M.S. in Physical Education from Madison this summer. She has been an instructor at Montevideo High School for the last four years.

Susan H. Varner of Luray has been appointed Interim Instructor in Music at Bridgewater. She graduated in Music Education from the college in 1969. She received her M.A. in Education with a major

in music from Madison this past summer.

Mrs. M. Elizabeth Hibbard has been appointed a part-time Instructor in Home Economics. Mrs. Hibbard has a B.S. degree from the University of Massachusetts and an M.A. in Home and Family Life from Teachers College, Columbia University, where she also took additional work in early childhood education. A teacher of nutrition and home economics in the Massachusetts public school system, she also taught nutrition to nurses at Ohio Northern University and served as a dietitian in a Boston hospital.

With a group from Columbia University, Mrs. Hibbard made two trips to Iron Curtain countries and free countries to study their educational systems and social structures.

Mrs. Hibbard is the wife of Emerson Hibbard, dean of Blue Ridge Community College. The Hibbards have two children, Steven and Shirley.

Pinion Players Present 'Bus Stop'

The Pinion Players' fall production, "Bus Stop," by William Inge, was presented November 12, 13, and 14.

The plot centers around Cherie, played by Melissa McDonald, a senior philosophy and religion major from McLean, Virginia, and Bo Decker, the man she does not want to marry. In the role of Bo Decker, the Pinion Players introduced Ken Flora, a freshman from Waynesboro, Pennsylvania.

Other parts were played by Webb Booker, Anna Grimm, Galen Heisey, Steve Beckner, John Koebert, and David Trout.

Other Pinion Players' productions throughout this school year include three student-directed one-act plays, a fall and spring convocation, and a presentation of "Look Homeward, Angel" in the spring.

Bridgewater College Lyceum Series

The African Heritage Dance and Music Ensemble, a group of young black musicians, dancers and singers, opened the Lyceum Concert Series, September 23. They presented a program of personal interpretations of authentic African, ethnic and modern dance.

The November 5 Lyceum program featured William Flanders, an Episcopal clergyman in a concert of his own songs. A songwriter and singer, he has three recordings to his credit.

On December 3, Tom Noel, a prominent Broadway actor, will present a "Treasury of Mark Twain," some of which has never been performed anywhere before this tour. Mr. Noel has performed on Broadway, with touring companies, in motion pictures, and has made extensive television appearances.

On February 24, Kenyon Martin will present "Beyond Words," a series of original vignettes in pantomime. Mr. Martin studied pantomime in New York and Paris, toured France and appeared on French television. Since his return from Europe, he has performed on television, in Carnegie Hall, at arts and dance festivals throughout the country, and in many colleges. He is currently on the faculty of Brandeis University and director of the National Pantomime Theater.

The new Boston Percussion Ensemble will perform on April 21. They combine "the traditional with the contemporary to produce musical sound that rivals the range and dynamics of a full orchestra." The ensemble is a trio that includes a pianist and two percussionists.

Student 'Who's Who' Selections

Seven Bridgewater College students have been selected for inclusion in the 1970 edition of "Who's Who Among Students in American Universities and Colleges."

Charles Edward Armbruster, Jr., son of Mr. and Mrs. C. E. Armbruster of Titusville, Florida, is a

senior math major, planning a career in computer science.

Charles W. Fairchilds, son of Mr. and Mrs. J. V. Fairchilds of Richmond, Virginia, is a senior economics major, planning to attend graduate school.

Ruth Ferree, daughter of Mr. and Mrs. Albert B. Ferree of Thurmont, Maryland, is a junior French major, planning to go into secondary school teaching.

Larry Wayne Glick, son of Mr. and Mrs. Donald L. Glick of Port Republic, Virginia, is a senior sociology major, looking toward a career in social work.

Amos M. Hall, son of Mr. and Mrs. Amos J. D. Hall of Bassett, Virginia, is a junior philosophy and religion major, planning to go either into the ministry or into teaching.

Kristine Jorgenson, daughter of Mr. and Mrs. Jack C. Jorgenson of Alexandria, Virginia, is a senior Spanish major, planning on teaching after graduation.

Marilyn Jo Wampler, daughter of the Rev. and Mrs. Byron J. Wampler of Hagerstown, Mary-

land, is a senior history major, planning to teach in the elementary schools.

Debate Club

The Debate Club under Dr. Roger E. Sappington's direction plans to attend 10 to 12 tournaments during this college year. Several of the upcoming ones will be held at Wake Forest, Susquehanna University in Pennsylvania, Elizabethtown College, at the regional DSR-TKA (debating fraternity) open to all schools in this region, which includes the District of Columbia, West Virginia, Maryland, Delaware, and Virginia.

The total record for last year was 71 wins and 75 losses. There are usually two-man teams, with six rounds in a tournament, with an average of 25 schools represented. Most of the tournaments the College team enters are in North Carolina, Virginia, and Pennsylvania, although last year they attended the national DSR-TKA tournament in Alabama, and plan to go to Indiana for it this year.

Each year a national committee chooses a topic to be discussed by college debaters throughout the country. Selected for this year's topic is: "Resolved: that the Federal Government should adopt a program of compulsory wage and price controls."

Members of this year's Debate Club are Phil Whitlock, senior; Dale Houff, junior; Carolyn French, Lillie Cubbage, Harlow Flory, and Bob Anderson, sophomores; and Richard Lowry, Greg Peters, Bill Albright, David Huffman, and Joanne Worthington, freshmen.

Faculty Promotions

Faculty promotions made this year are: Dr. Emmert S. Bittinger, to Professor of Sociology; Robert L. Hueston, Associate Professor of Business Administration; Paul M. Cline, Associate Professor of Art; Dale E. Mekeel, Associate Professor of Social Science; Wayne M. Barkey, Assistant Professor of Physics, and Mrs. Virginia H. Myers, Assistant Professor of Home Economics.

Summertime Campus Improvements

During the summer, maintenance crews, along with some student labor and a two-girl painting crew, worked at preparing the campus for the return of the students.

Dormitory rooms, furniture, outside trim, lamp posts, fire escapes, and several faculty homes were repainted. Renovations were made in Memorial Hall, with the ceiling of the former Memorial Hall Chapel being replaced.

A suite of rooms on the lower level of Founders Hall was renovated for Admissions Offices.

The Flory House, a former administrative annex building, no longer in use, was torn down.

To provide space for off-street parking for persons attending athletic and cultural events at the College, several small wooden buildings, which formerly housed the infirmary and the art department, were leveled. This long-planned facility is located east of Cole Hall, the Kline Campus Center, and Moomaw Hall. A section of the lot is designated for additional student parking.

Shenandoah Valley Music Festival

On Saturday evening, August 8, 1970, in the auditorium of Massanutten Academy at Woodstock, Virginia, Dr. Richard Lert conducted the Shenandoah Valley Music Festival Orchestra and Chorus in a performance of Beethoven's Ninth Symphony. The players were the instrumentalists who had been attending the Eastern Institute of Orchestral Studies that is sponsored annually by the American Symphony Orchestra League in Orkney Springs. The 140-member Shenandoah Valley Chorus came to Madison College once a week for Tuesday night rehearsals, which began the third week in April, under the

direction of Dr. Gordon Ohlsson, head of Madison College's Department of Music. The singers, amateurs who love to sing, included several persons connected with the college: Professor John Barr and Professor Ellsworth Kyger, Mrs. Sue Propst of the library staff, Joe W. Miller, '22, of Broadway, Jo Annis Humbert Eller, '55, of Crimora, Virginia, and Dave Brene-man, '68, of Broadway. William G. Kinzie, II, '60, who teaches strings in Roanoke and plays in the Roanoke Symphony, was a member of the orchestra, which was made up of players from all over the United States and several foreign countries.

SPORTS

By STEVE MASON '74

Football

Although the BC football team has played solid football so far this year, it has also had some disappointments.

The first game of the season, which was against W. Va. Tech, could have gone either way. The game was so well played that one mistake could have made the difference. BC made the mistake—a bad snap on a punt attempt—and Tech capitalized on it. The final score was 7-0, Tech's favor.

The second game was different. Bridgewater played Western Maryland and, in a come-from-behind effort, won the game, 28-22. This is the first victory that BC has ever had over Western Maryland.

The football team then opened its season at home against Hampden-Sydney. In this game the Eagles were completely overpowered and, therefore, played poorly. The final score was 34-0.

Against Gallaudet, the following week, the Eagles put together its most impressive performance of the season. The offense amassed a total offense of 406 yards while the defense held the Gallaudet team to

a total offense of —6 yards. Marshall Flora, gaining 254 yards and scoring 4 touchdowns, led BC to a 34-0 triumph.

On October 17, the Eagles faced their homecoming foe, Frostburg State. Frostburg went into the game with an undefeated 5-0 record which BC very nearly spoiled. The score was 9-7 in favor of Frostburg for the majority of the game. BC was within the 5 yard line twice but failed to score. Frostburg scored again in the fourth quarter and won the game 16-7.

This year's coaching staff is again headed by John Spencer, who is in his third year as head coach for BC. Carlyle Whitelow, in his second year at Bridgewater, is assistant coach and in charge of the backfield. The newcomer to the coaching staff, Lynn Carr, is responsible for the linebackers and the middleguards.

Traditionally a running team, BC is going to the air more this year. But as Coach Spencer stated in a pre-season interview, "We'll have to establish our running game before we go to the air. If we

get our running attack moving smoothly, we'll have more opportunities to pass the ball."

The Eagles have been going to the air more and the primary reason comes in the frame of a 5'7",

Marshall "Bowling Ball" Flora, recipient of "Most Valuable Player"—1970 statistics to date: (5 games)

Attempts	139
Rushing yardage	698
Yards per carry	5.0
Yards per game	139.6
Touchdowns	6
Best game	254 yds.
	—Gallaudet

Homecoming statistics:

Attempts	34
Rushing yardage	132
Yards per carry	3.9
Touchdowns	1

He has almost 2,700 yards rushing in his football career at Bridgewater. If he maintains his present pace, he will go well over the 3,000 yard mark.

175 pound senior tailback named Marshall Flora, affectionately called "Bowling Ball." "Ball" continues to spark the Eagles offense as he has for the past two years. This year, however, he appears to be headed for his most impressive season.

Flora is supported in the backfield by senior quarterback Wayne Dodson and senior fullback Jay Moore. Dodson and Moore are the Eagles' co-captains for 1970.

The defense, which in the past has been a weak point, is much stronger this year due to an overall team effort. Outstanding defensive players this year are Larry Blohm, Claude Shell, James Hulvey, Tom Scinto, and Dennis Doherty.

This year's team lost very little talent in last year's graduation. The team has 26 returning lettermen and these are boosted by a good crop of freshmen, some of whom are filling gaps left by graduation.

Marshall Flora put together another sparkling performance in the October 24th game against St. Pauls, leading the Eagles to a 24-0 victory.

Cross Country

The Bridgewater Cross-Country team, led by sophomores Doug Coleman and Bob Anderson, is headed toward another very successful season. Presently sporting a 4-1 record, the harriers will be trying to retain the Virginia Small College League title, as well as regain the Mason-Dixon conference title.

This year, the Eagles have six home meets, including the Virginia Small College League on October 30. The home course was extended this year from 3.75 miles to 5 miles to comply with a new NCAA ruling.

Coaches Charles and Vern Fairchilds have a very high opinion of the team. They have stated that the BC cross-country team should be strong for many years yet. This year the team is young, with 8 of the 13 members being freshmen. The remainder of the team is composed of 3 sophomores, 1 junior, and 1 senior.

In intercollegiate competition Coleman and Anderson have consistently finished 1-2. A freshman,

Bruce Wherry, is holding down the BC number 3 position. The coaches are very pleased with the depth that the freshmen have added to the team this year.

Coleman has been running very strongly this year. He holds the home course record, which is 27:10. Each time he has run the course, he has improved his time. Coach Charlie Fairchilds say "Coleman can very easily be the number one runner in the Mason-Dixon conference this year. Last year he was sixth."

BC opened the season at home with an 18-44 win over Lynchburg College. The next week in a home triangular meet BC beat Eastern Mennonite College 22-35, and Frostburg State College 20-38. The team's bid for an undefeated season was then ruined by Virginia Military Institute when they beat BC 25-35 at VMI. This is the same team that beat BC's harriers last year, ruining a similar situation. They bounced back to beat Washington and Lee, 21-34, with a very strong team effort.

Women's Field Hockey

This year, the women's field hockey team, led by co-captains Jill Clark at left wing and Daryl Montgomery at left half, has found its competition to be very rough.

Excluding the first match of the season, the Eaglettes have played well and the scores have been very close. They lost their opening match 5-1 to Madison. However, in the next match BC came back and battled to a 1-1 tie with Lynchburg College. The next week they held a strong Towson College team to a 2-1 victory. They then lost to Roanoke College, 2-0. In the next match the Eaglettes broke into the win column with a 2-1 victory over Mary Washington. Following this came a 2-1 win over Longwood and a 1-1 tie with William and Mary.

Pasco M. Bowman II Named Dean of the Wake Forest School of Law

PHOTO BY W. HUBERT GENTRY

"**H**E has been a hard worker and his friends predict a brilliant career for him." So said the article that appeared in the June 16, 1958 edition of the Harrisonburg Daily News-Record when Pasco M. Bowman II received his LL.B. degree from New York University.

A summa cum laude graduate from Bridgewater College in 1955 and first in his class, Dr. Bowman has been named dean of the school of law at Wake Forest University in Winston-Salem, North Carolina. Dr. James Ralph Scales, president of Wake Forest, said that Dr. Bowman "exemplifies an admirable combination of experience as practicing lawyer and legal educator. We are most pleased that he has agreed to lead this vital school in the university."

A Root-Tilden scholarship holder at NYU, he was also managing editor of the NYU Law Review, which at that time had the second largest circulation of any student-edited legal periodical in the nation. The Intramural Moot Court Competition, in which he was a finalist, began in his freshman year with 22 teams and proceeded until two years later when only two teams remained.

An associate attorney with the New York law firm of Craveth, Swaine & Moore from 1958-1964, he was on leave during 1961-62 while he held a Fulbright Scholarship to the London School of Economics and Political Science.

Dr. Bowman has been a member of the faculty at the University of Georgia School of Law from 1964 to 1970. His research and writing were the basis for the new Georgia Corporation Law enacted in 1968. He worked closely with the Georgia Legislature in securing the enactment of this measure, and is presently writing a book on the new Georgia Corporation Law. He has also had articles published in the Georgia Law Review, the Georgia State Bar Journal and the NYU Law Review.

Dr. and Mrs. Bowman have three children. Ann Katherine, 7, Helen Middleton, 4½, and Benjamin Garber, 2. Mrs. Bowman, the former Ruth Bowman, graduate of the class of '58, and daughter of former President and Mrs. Warren D. Bowman, taught music while they were living in New York and in London. While in London she sang with the London Bach Choir, taking part in several concerts at the Royal Festival and Royal Albert Halls and in a recording of Beethoven's Ninth Symphony conducted by the late Pierre Monteux and released by Westminster.

David E. Flora, Jr., is on the left with his father, David E. Flora, '48, and mother, Mabel Driver Flora, '48. Kenneth Lee Flora, at right, is standing with his father and mother, Mr. and Mrs. Samuel H. Flora, Jr. His father graduated in 1944, and mother, Lillie Baldwin Flora, in 1948.

FRESHMEN

with Alumni Parents

These pictures were taken at the reception for new students and their parents, held on the lawn in front of the library Friday afternoon, September 11.

Pictured on this page are some of the freshmen, whose parents are alumni of the College.

David G. Walbridge is pictured with his father, Gilbert C. Walbridge, who attended the College from '47-'49.

Charles Wilson, on the left, with his father, Elby, '41, and mother, Grace Roller Wilson, '48. Robert Lee Life, on the right, with his father, Lawrence Life, and his mother, Virginia Fike Life, '45.

Outstanding Young Women

Top—Martha Ann Campbell, Joyce B. Powell, Gail Conlon Quick. Bottom—Rose Marie Baker Dure, Yvonne Kauffman.

Selected to appear in the 1970 edition of Outstanding Young Women of America were the following alumnae: Martha Ann Campbell, '60, from Fredericksburg, Virginia. Miss Campbell was a dietitian on the hospital shop S.S. HOPE, which completed a Tunisia mission on July 15, 1970. Before joining the staff of the S.S. HOPE, she was with Mary Washington Hospital in Fredericksburg.

Joyce B. Powell, '63, originally of Staunton, Virginia, has enrolled in the Graduate School of Columbia University for the 1970-71 session under the auspices of a Rockefeller Foundation fellowship for reporting.

Prior to this, she was a writer for the New York Times. In 1968-69 she was a reporter for Station KQED, the San Francisco Bay Area's National Educational Television outlet. This past year she was a producer-writer for the News Department of ABC-TV in San Francisco.

After this year at Columbia Uni-

versity, Miss Powell plans to return to San Francisco to write and produce documentary films for television.

Mrs. Gail Conlon Quick, '60, is presently a guidance counselor at Catoctin Senior High School in Thurmont, Maryland. She has been teaching in Frederick County for five years. During the summer, she served as Youth Director for one of the Teen Centers in Frederick. An active member of the Frederick Tennis Club, she coaches both boys' and girls' varsity tennis teams, teaches an adult physical fitness class, and was a panel member for the White House Conference on Youth 1970. She is presently enrolled at Western Maryland College in the Master's program in guidance.

Mrs. Rose Marie Baker Dure, '65, originally from Waterside, Pennsylvania, graduated with a major in music education. Presently living in Wallingford, Connecticut, with her musician-composer husband, Robert G. Dure, she

is teaching vocal music in three elementary schools in Meriden, Connecticut.

Prior to moving to Connecticut, Mrs. Dure taught elementary vocal music for five years in Bel Air, Maryland, gave private piano instruction, and was church organist and choir director. She plans to continue working on a masters degree in music education, which she began at Towson State College in Baltimore, Maryland.

Yvonne Kauffman, '66, is head of the Women's Physical Education Department at Elizabethtown College. She advises the cheerleaders and coaches field hockey, tennis, and basketball. President of the Lancaster County Field Hockey Club, she was in charge of the field hockey game between the Netherlands and U.S. teams in 1968, and also in charge of the fields for the 1970 National Field Hockey tournament. She has completed 27 credits towards her M.Ed. degree at West Chester State College.

Outstanding Young Men Selections

Selected for inclusion in the 1970 edition of Outstanding Young Men of America are the following alumni. Criteria for selection includes a man's service to others, professional excellence in his career, and community service.

Delmer G. Botkin, '64, assistant principal and athletic director at Robert E. Lee High School in Staunton, received his M.Ed. from the University of Virginia in 1968.

He belongs to Phi Delta Kappa, an educational fraternity. Between his sophomore and junior years at Bridgewater, Mr. Botkin played professional baseball with the Milwaukee Braves. He and his wife, the former Sue Grove, '65, of Bridgewater, attend the Church of the Brethren in Staunton. They have one daughter, Angie Sue, 15 months.

J. Robert Branner, '64, is a senior accountant with S. B. Hoover and Co., a C.P.A. firm in Harrisonburg. Treasurer of the Harrisonburg Exchange Club, president of the community band, organist and on the church council of the Lutheran Church, he has helped with the Heart Fund and the Cancer Fund. He and his wife, Melody, have one daughter, Monica Faith.

Chadwick J. Edwards, '65, is acting chairman of the Fine Arts Department and director of choral

music at John Marshall High School in Richmond, Virginia. An Old Dominion Fellow, he is also director of music at the Seventh Street Christian Church, a member of the Richmond Choral Society, Virginia Music Educators Association, and American Choral Directors Association. He came to Richmond from Manassas where he taught school, and was the founder-director of the Manassas Choral Society.

Nathan H. Miller, '65, is a 1969 graduate of the T. C. Williams School of Law in Richmond, where he was a member of Phi Delta Phi legal fraternity. A member of the Junior Chamber of Commerce, Rockingham Male Chorus, Bridgewater Church of the Brethren Board of Administration, he is presently an associate of the Conrad, Litten, and Sipe law firm in Harrisonburg. He is also chairman of the Alumni Events Committee for the College.

Charles David Jones, '65, senior medicinal chemist with Eli Lilly and Company, received his Ph.D. degree from Pennsylvania State University in December, 1969. The research contained in his doctoral thesis was published last year in

Top—Delmer G. Botkin. Left—J. Robert Branner. Bottom—Chadwick J. Edwards, Nathan H. Miller, Michael A. Gardner, Peter D. Weimer. Not pictured are Dr. Charles David Jones and Dr. Paul V. Phibbs, Jr.

the Journal of the American Chemical Society. He is a member of the American Chemical Society and Phi Lambda Upsilon, an honorary chemical fraternity. He and his wife, the former Virginia Susann Long, '65, live in Indianapolis.

Michael A. Gardner, '66, of Wright, Speicher and Gardner, Inc. Insurance. Mr. Gardner is immediate past president of the Cumberland Valley Chapter of the Bridgewater Alumni Association and immediate past president of the Independent Insurance Agents' Association of Hagerstown, Inc. He is a member and committee chairman of the Kiwanis Club, a choir member and on the Administrative Board of the John Wesley United Methodist Church. He and his wife, the former Carolyn Sue Crumpacker, have a five-month old daughter, Stacey Michelle. The live in Hagerstown, Maryland.

Paul V. Phibbs, Jr., '64, is assistant professor of microbiology at the Medical College of Virginia, with teaching duties and research on the regulation of metabolism in various bacteria. While in graduate school, he was elected to Phi Kappa Phi, a national honor society, and to the society of the Sigma Chi. He is also a member of the American Society for Microbiology. Portions of his work have been published in the Journal of Infectious Diseases and in the Archives of Biochemistry and Biophysics. He has also presented papers on his research at national and local meetings of the American Society for Microbiology and the Federation of American Societies for Experimental Biology and Medicine. He received his Ph.D. in 1969 from the University of Georgia. He is married to the former Marilyn Wise of Plains, Georgia.

Peter D. Weimer is an attorney in private practice of law in Manassas, Virginia. He is a member of the Prince William County Bar Association and American Bar Association. He is also a member of the Law and Clergy Committee of the American Bar Association, and president and general counsel of Leta Ann School of Manassas, Virginia. Mrs. Weimer is the former Myrna L. Dove, '59.

Medical College of Virginia Honors Former BC Dean and Alumna

LEFT—Dr. and Mrs. William Thomas Sanger at unveiling ceremonies for plaque in Sanger Hall. BELOW—Dr. Kinloch Nelson (right), Dean of the MCV School of Medicine, presents Savings Passbook Gift to Miss Virginia Miller. Looking on is Dr. William Thomas Sanger.

VCU VISUAL EDUCATION PHOTO

This past spring the Medical College of Virginia dedicated its medical education building to Dr. William Thomas Sanger, chancellor emeritus and former president of MCV, and an alumnus, former dean and professor at Bridgewater College.

In a brief ceremony preceding the sixth annual Sanger Lecture, a bronze plaque was unveiled in the main lobby of the medical education building, which is named Sanger Hall.

Dr. Sanger was president of MCV from 1925 to 1956, chancellor from 1956 until 1959 when he was named chancellor emeritus. MCV is the health sciences division of Virginia Commonwealth University.

During his career as an educator, Dr. Sanger has served more than 10 states as an official consultant on medical, hospital, and health problems.

A native of Bridgewater, Dr. Sanger received a B.A. degree from Bridgewater College in 1909, a

master's degree from Indiana University, and a Ph.D. from Clark University. He has been on the faculties of Bridgewater College, State Teachers' College at Harrisonburg (Madison), and the Universities of Utah and Virginia.

Before going to MCV as the college's first full-time president, Dr. Sanger was secretary of the State Board of Education.

Mrs. Sanger unveiled the plaque dedicating the building to Dr. Sanger for "his ability and vision that were major factors in the academic and physical development" of MCV.

Mrs. Sanger is the former Miss Sylvia Gray Burns, also a graduate of Bridgewater College.

In another news release from MCV came word of Miss Virginia Miller, '22, who was honored at a luncheon in February of last year on her retirement after 42 years of service to the Medical College.

Dr. Kinloch Nelson, dean of the School of Medicine, presented

Miss Miller with a \$1500 savings passbook and a keepsake album containing the names of nearly 150 dean's office employees and medical alumni who contributed to the retirement savings gift.

Miss Miller came to MCV on June 1, 1927, as secretary to the dean of medicine—although the school at that time had no full-time dean. She also was assistant to the registrar—although there was no registrar. The School of Pharmacy also had no full-time secretary during the depression years, and Miss Miller served both schools helping with correspondence and student grade records. During her 42 years at MCV, she served six medical deans and several interim dean's committees.

A native of Bridgewater, Virginia, Miss Miller is the niece of Dr. William Thomas Sanger, president emeritus of MCV.

Miss Miller's retirement plans include visiting with old friends in Richmond and perhaps a first-time trip to California.

CLASS

CLASS OF 1960—Front row (L to R): Norma A. Diehl, Fred Diehl, Evelyn L. Flora, Robert Flora. Back row (L to R): Anne Muray Reid, R. C. Reid, Joyce Whitacre Bohn, Richard Bohn.

CLASS OF 1950—Front row (L to R): Anne Boltz Howdershell, Nancy Garst Trout, Ruth Jane Richmond Barth, Augusta Neff, Allison Roller Newsome, Pat Clague, Betty Lew Poling Flory, Natalee Lorenzo Spencer. Back row (L to R): A. C. Hankla, Jr., Philip Trout, Doady Jordan Didawick, Bill Howdershell, Ray A. Neff, Jack Maphis, Tom Jenkins, Ernest Hooker, Harry M. Gardner, Paul H. Garst, Allen M. Clague, Byron M. Flory, Jr., Margaret Faulkner Horn, Robert Horn, E. D. Spencer.

CLASS OF 1945—Front row (L to R): D. S. Myers, Glenna C. Myers, Elsie Jones Beam, C. H. Beam, Jr., Virginia Fike Life, Gene Bowman Johnson, Marie M. Flory, Wendell Flory. Back row (L to R): Ray Martindale, Miriam Martindale, Emmert Bittinger, Esther L. Bittinger, Lawrence Life, David Holl, Miriam Holl, Mrs. Wayne Geisert, Dr. Wayne F. Geisert, Wilma Robertson, Jesse D. Robertson.

CLASS OF 1930—Front row (L to R): Rachel Driver Murphy, Gilbert R. Kinzie, Mrs. Francis Wayland, Francis F. Wayland, Rebecca V. Myers, J. Harold Funk, Ruth Miller Nininger, R. Douglas Nininger. Back row (L to R): Mary Driver Hess, Samuel A. Harley, Elsie Hollen Harley, Esther Pence Garber, William J. Garber, Nellie (Dido) Jones Young, John T. Watt, Mrs. John Watt, G. A. McDaniel, Crystal Driver Wakeman, B. O. Wakeman.

REUNIONS

CLASS OF 1951—Front row (L to R): Joseph Fishel, Jean Fishel, Helen Saxon, Waltine Robinson, Peggy Mason, Kathleen Funkhouser Armstrong, Ann Eller McDaniels, Jacqueline Grove Towers. Back row (L to R): Guy Didawick, W. E. Saxon, Tom Robinson, Harold W. Armstrong, Clayton Towers, Ivan Mason, Raymond Moore, Jr., Carl McDaniels, Flemmie E. Stultz, Owen G. Stultz.

CLASS OF 1969—Front row (L to R): Nelda Marecki, Ronald Messersmith, Wayne Carpenter, Anne Carpenter, Kim Betts, Joanne Pournaras. Back row (L to R): Paul Marecki, Margaret P. Stover, Fred Hollen, Diane L. Miller, Ed Rhodes, Chris Rhodes, Robert E. Alley.

CLASS OF 1949—Front row (L to R): Fran Clayton, Vera Kline, Margie Ann Conner, Alvin Conner, Hazel Brubaker, Frances W. Flora, Fay Reubush, Louise G. Showalter. Back row (L to R): John Clayton, Harley Kline, Jean Prather, Dot Prather, Herman W. Brubaker, Edgar A. Flora, C. B. Reubush, Jr., Marilee M. Sackett, Charles M. Sackett.

Alumni Association Executive Committee Meeting

Approval of a second European Tour, to be held this summer, '71, and establishment of a Most Valuable Player trophy were two of the more important items of business enacted at the Executive Committee meeting of the Alumni Association on Saturday, October 3, in the Kline Campus Center. Members of this year's Executive Committee are Wallace Hatcher, '55, Association president; Dick Obenshain, '56, president-elect; Fay Jaynes Reubush, '49, vice president; Sandra Barnhart Keeler, '70, secretary; Ray M. Wine, '51, treasurer; Nathan H. Miller, '65, and Becky Hershey, '70, newly appointed members for a one-year term; Walt Smith, Director of Alumni Relations; and Dr. Wayne F. Geisert, President of the College, ex officio.

After hearing reports of the successful European Trip this past summer, which was the first sponsored trip by the Association to become a reality, the Executive Committee voted unanimously to make such an opportunity available again to all alumni and friends of the College. Additional information is found on the inside back cover.

A Most Valuable Player trophy, on a trial basis, is to be given to an Eagles player at this year's Homecoming game. The Alumni Events Committee, under the chairmanship of Nathan Miller, was given the responsibility by President Hatcher to carry out this award for this year.

President Hatcher made several committee appointments for the coming year. Serving on the Auditing Committee will be Kenneth W. Huffman, '61, and Richard E. Phillips, '63. Serving on the Scholarship Committee will be Dr. Emmert F. Bittinger, '45, chairman; Carlyle Whitelow, '59, Roy J. Hildebrand, '37, John W. Ponton, '71, president of the Senior Class, and Joanne M. DeRossi, '71, secretary of the Senior Class. Serving on the

CLASS NOTES

'70

Jeanette R. Halpin is serving on the staff of Vashti School, a United Methodist secondary school in Thomasville, Ga. She is serving a two-year special term home mission service under the National Division of the United Methodist Board of Missions in the U.S. and Puerto Rico.

Jay R. Laviolette has been traveling throughout Florida during 1969 and 1970 as a bank examiner for the Florida National group of banks.

Nominating Committee for Association officers are Betty Halterman Kline, '55, chairman; Ben W. Partlow, Jr., '60, and Robert A. Wolfe, '66. Also confirmed as a member of the Board of Directors for the current year as called for by the Association Constitution is the appointment of John W. Ponton, '71, president of the Senior Class.

Other business included a report by Walt Smith of the redistribution of the membership of the Board of Directors whose terms run for three years. The distribution was brought about by a large number of Board members whose terms expired all the same year which in turn allowed for an unequal distribution of Board members to be elected each year. It was reported that a committee under the chairmanship of past president and alumni trustee, Harold H. Hersch, '51, as chairman, has begun to restudy the Association Constitution, especially the

section dealing with the duties and lengths of term of Association officers. Other members of this committee are Judy Nolen Henneberger, '64, and Alvin E. Conner, '49.

Also discussed was the permanent placing for good public display of the Distinguished Alumnus plaque and a sign on campus noting the location of the Alumni Relations Office. No action was taken on either item.

The Executive Committee elected President Hatcher as its representative to help in the selection of a replacement for Walt Smith as Director of Alumni Relations.

The class of 1970, with Ron Hottle as president, presented to the College their gift of a bulletin board, metal-framed, glass-fronted, black felt backed. It has been placed behind the reception desk in the Kline Campus Center, for the posting of campus activities.

'67

Brenda Cockram is A/R control assistant for General Foods Corp. in Chamblee, Ga.

The Virginia State Library has awarded Shirley Bowman Jamison a fellowship for graduate study in library science at the University of North Carolina in Chapel Hill.

Benjamin H. Andes, '11, Broadway, Va., July 3, 1970.

Emma Miller Lineweaver, '05, Harrisonburg, Va., July 29, 1970.

Alvin B. Cline, '03, Keezletown, Va., June 20, 1970.

Lula Kyger Conrad, '03, Cleveland, O., June, 1970.

Mrs. Eva Eutsler Dull, '90, Bridge-water, Va., July 8, 1970.

The 1971 Bridgewater College Alumni Tour

On his return, as director of the 1970 Bridgewater College Alumni Tour, David L. Holl, Director of Development, said, "It was excellent—very well handled and very well planned. I thoroughly recommend the tour, the company, the itinerary. We covered a lot of distance, and yet in no sense were we rushed. We saw the highlights of each of the major cities visited. It was most enjoyable!"

The Alumni Association is pleased to announce that for the summer of 1971, we will sponsor a tour to Europe for all interested alumni, parents, faculty, friends, and their families. It will be a three-week tour, leaving from Washington in July by jet for Paris and returning in August from London.

There will be many exciting features of this tour . . . from Paris to Lucerne, a lovely lakeside resort in the very heart of Switzerland . . . from Lucerne to Vaduz, capital of the principality of Liechtenstein . . . through the Austrian Alps to Innsbruck and a Tyrolean Folklore performance . . . on to Munich, capital of Bavaria . . . through the Neckar Valley and a cruise on the Rhine River . . . Amsterdam, with an evening motorlaunch trip through the canals . . . Copenhagen, with the Tivoli Gardens, the Little Mermaid, a cruise on the harbor, and a visit to Den Permanente, an exhibition of arts, crafts, weaving, and Danish modern furniture . . . on to Oslo, with shopping for hand-knit items, enamelware, silver Viking craft, or a visit to Bygdoy Peninsula with the Viking

ships, and the Kon-tiki raft . . . Geilo next, site of the 1952 Winter Olympics . . . through the Hallingdal Valley with its picturesque villages and timbered farmsteads, and overnight at a Geilo mountain resort hotel . . . through spectacular Norwegian scenery, including the Voringfoss waterfall with a free drop of more than 500 feet, and a cruise abroad a fjord steamer . . . a view of the Folgefonn Glacier and on to a panoramic view of the island-studded coast and the North Sea . . . a ride on a high-speed hydrofoil boat for a cruise down the Karmsund . . . then London, with several days for sightseeing, shopping, and independent activities, before the return flight to Washington.

The tour price of \$995.00 includes round-trip, jet air transportation from Washington, accommodations, sightseeing and transportation in Europe, and almost all meals. The services of a professional tour company, thoroughly familiar with European travel, has been secured to take care of all details for a worry-free vacation.

Before departure you will receive full details on shopping, currency, packing, and other information to assist you with your travel preparation.

Walter Smith, Alumni Director, says, "We hope you will take advantage of this unforgettable opportunity to tour with a congenial group of fellow travelers. For additional details, please contact the Alumni Office."
